
D50.0 (50 % PWM): integral / derivative chain of QEI position
absement -> position -> velocity -> acceleration -> jerk
motor 0
motor 1
absement $\int\theta\,dt$ / steps·s
position θ / steps
velocity $\dot{\theta}$ / steps·s^{-1}
acceleration $\ddot{\theta}$ / steps·s^{-2}
jerk $\dddot{\theta}$ / steps·s^{-3}
time / s
